

An Automotive Manufacturer

Client Spotlight

Duration of the Project

1 Month

(May 2012 – June 2012)

Team Size:

03

An Overview:

The client has setup new manufacturing plant at different locations which will be working as a different company with common business rules. HEURISTICS Team helped the client to configure and setup new plant with India localization.

Business Requirements and Challenges:

- Client was planning to setup new manufacturing plan on existing implementation.
- They would like to use existing Item definition with specific business rules.
- Client was planning to use common chart of account, suppliers, banks and customer with restricted access.

Solution: New Plant Setup with India localization

HIPL Role: Our Team helped the Client in:

- Configuring and Setting up new Manufacturing Plant with India Localization
- Enabled Access of More than 2500 common items, 4000 Quality Plans
- Migrated 500 BOM and Routing Details
- Migrated Tax Structure and Tax Profiles
- Security Restriction between two plants

HIPL Value Addition for Client benefit:

- Saved Time to re-create items / BOM / Routing / Quality Plan
- Training to the user on Order Processing
- Able to perform Inter-Org Transfer over the system
- Separate Plants with different business rule on common server
- Consolidate Financial Statement for both plants
- Restricted Access on Plant Data
